TITLE : HOLDER FOR OPTICAL PARTS AND
METHOD FOR MANUFACTURING
SPECTACLE LENS USING THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To provide an optical part holder which is a holder for holding optical parts to be subjected to surface treatment of the optical parts and is capable of surely holding the optical parts, preventing the deformation and the falling of optical parts, prolonging the life of the holder, holding even the optical parts of different external diameters with the one holder and minimizing the kinds of the holder.

SOLUTION: An arm part of an optical part retainer for holding the optical parts of the holder for holding the optical parts is formed of a shape which is a continuous rugged shape and is changed to a straight form or curved form in its width direction.
